Conic Systems Hires New Business Development Manager

JACKSONVILLE, FL. 5/1/2019 - Conic Systems is proud to announce the appointment of Carl Postiglione as the company's new Director of Business Development. Carl brings 20 years of business development and sales experience to our team and holds degrees in both Electrical Engineering and Mechanical Engineering.

His key focus will be managing the introduction of new products to the market, including Conics' new *Lifetime Series*™ zero backlash servo gearhead line, and our latest CSF and SHF zero backlash harmonic gearing lines for the robotics industry. Additionally, Carl will be working to expand business partnerships, both domestically and internationally.

Carl's base of operations is our Research & Development lab in Jacksonville, FL and says one of his favorite parts of the job is interacting with our engineers during their precision dynamics testing and quality research projects. Carl Postiglione will be a major component to our company's continued growth and prestige.

Conic Systems has served the industry for over 50 years and we continue to develop new technology to replace traditional planetary drives. Our products are used in precision automation, robotic and industrial applications and are known worldwide for high precision, durability and long life.
